CORROSION

Volume 25

JANUARY 1 – DECEMBER 31

1969

CONTENTS

- Tables of Contents
- Alphabetical Subject Index
- Alphabetical Index to Authors

Tables of Contents

CORROSION, Vol. 25, 1969

January

Apparatus for Stress Corrosion Tests in Boiling Magnesium Chloride Solutions
M. A. Streicher and A. J. Sweet 1

Oxidation of 304L Stainless Steel by Steam and by Air
J. T. Bittel, L. H. Sjodahl, and J. F. White 7

Influence of Alloying Elements on the Stress Corrosion Behavior of Austenitic Stainless Steel
A. W. Loginow and J. F. Bates 15

Resistance of Explosion-Bonded Stainless Steel Clads to Intergranular Corrosion
B. Hill and L. F. Trueb 23

Corrosion and Hydrogen Pickup of Zircaloy in Concentrated Lithium Hydroxide Solutions
S. Kass 30

February

The Application of Electrochemical Techniques to the Study of Corrosion of Automotive Trim Materials
M. S. Walker and L. C. Rowe . .47

A Study of the Mechanism of Dezincification of Brasses
E. E. Langenegger and F. P. A. Robinson 59

Technical Note: Polarization Behavior of Niobium in NaOH
D. L. Piron and Ken Nobe . . .67

Double Layer Capacitance Measurements of Inhibitive Properties of HCl of Some Phosphoroorganic Compounds
B. Dus and Z. Szklarska-Smialowska 69

The Nature of Corrosion of Zinc by Sulfurous Acid at Ordinary Temperatures
W. McLeod and R. R. Rogers . .74

Directional Effects in the Stress Corrosion Cracking of an Aluminum Alloy
G. M. Ugiansky, L. P. Skolnick, and S. W. Stiefle 77

Technical Note: Effect of "Pure" Methanol on the Cracking of Titanium
E. G. Haney and W. R. Wearmouth 87

Corrosion Studies of Aluminum-Brass Condenser Tube Material
K. Balakrishnan, Pl. Annamalai, B. Sathianandham, N. Subramanyan, and S. Sampath 92

March

Corrosion Behavior of Nonferrous Alloy Feedwater-Heater Materials in Neutral Water with Low Oxygen Contents
E. G. Brush and W. L. Pearl 99

Hydrogen Embrittlement of Type 304L Stainless Steel
M. L. Holzworth 107

Discussion: Surface Stress on Hydrogen Absorption by 4340
R. M. Hudgins, D. I. Phalen, and D. A. Vaughan 116

Corrosion of Ni-Cr-Al-Fe Alloys by Hydrogen Sulfide at 1100 to 1800 F
F. J. Bruns 119

Sulfidation of a Complex Nickel Base Alloy—Inconel 713C
J. Chander and H. J. McQueen . 126

Discussion: Role of the Anion in Passive Layer Formation
O. L. Riggs, Jr. 130

Liquidus Curves and Corrosion of Fe, Ti, Zr, and Cu in Liquid Bi-Pb Alloys
J. R. Weeks and A. J. Romano . 131

The Role of Arsenic in Preventing the Dezincification of α-Brass
E. E. Langenegger and F. P. A. Robinson 137

April

Mechanism of Corrosion Tunnelling with Special Reference to Cu_3Au
P. R. Swann 147

Corrosion Behavior of Nickel and Inconel in Acidic Chloride Solutions
D. L. Piron, E. P. Koutsoukos, and Ken Nobe 151

Behavior of Fiber Reinforced Plastic Materials in Chemical Service
R. F. Regester 157

An Investigation of Mode of Failure of Copper-Beryllium Alloy Specimens in Stress Corrosion Fracture
W. D. Sylwestrowicz 168

Technical Note: Effect of Bulk Oxides on Anodic Polarization of Steel in NH_3-NH_4-NO_3-H_2O Solutions
O. L. Riggs, Jr. 170

Anodic and Cathodic Behavior of Maraging Steel in Acid Solution
R. F. Tobias and Ken Nobe . . 173

Technical Note: Explanation of the Cleavage Plane Observed in Stress Corrosion Cracking of Alpha Phase Titanium-Aluminum Alloys
David A. Mauney and E. A. Starke, Jr. 177

Anodic Passivation of Metals in Fused Salt Electrolytes
Ivan D. Dirmeik 180

Anodic Polarization of Anodized Aluminum
D. A. Jones 187

May

Research on Notch Plasticity May Contribute to the Understanding of Stress Corrosion Cracking
J. W. Spretnak and C. A. Griffis 193

Corrosion Behavior of Ni-Cr-Iron Alloy 600 in Borated Pressurized Water Reactor Environments
D. Van Rooyen, H. R. Copson, and W. E. Berry 194

A New Solution Potential Measurement for Predicting Stress Corrosion Performance of 2219 Aluminum Alloy
R. L. Horst, Jr., E. H. Hollingsworth, and W. King . . 199

Technical Note: Stress Corrosion Cracking of Titanium in Alcohol-Iodine Solutions
A. J. Sedriks 207

A Correlated Potentiostatic Microscopic Study of Iron Passivation in Sulfuric Acid
A. Pigeaud and H. B. Kirkpatrick 209

Correlation of Ti-6Al-4V Fractographs with Mechanical Behavior in Methanol-Acid, Methanol, and Air Environments
H. L. Gegel, H. B. Kirkpatrick, and C. M. Swinning 215

Thermal Stability of Hastelloy Alloy C-276
R. B. Leonard 222

June

Passivity and Anodic Protection
J. E. Reinoehl and F. H. Beck . 233

Use of Internal Damping Measurements in the Study of Environmental Cracking
A. Thiruvengadam, M. Gunasekaran, and H. Preiser . . 343

Flaw Growth in Ti-6Al-4V in Freon Environments
L. Raymond and R. J. Usell . . 251

Electrochemical and Corrosion Behavior of Fe-Ni Alloys in Sulfuric Acid
R. R. Sayano and Ken Nobe . . 260

Recent Applications of Electrode Potential Measurements in the Thermodynamics and Kinetics of Metal Corrosion
M. Pourbaix 267

July

Clarification of the Mechanism of the De-Alloying Phenomena
NACE Sponsored Research . . 285

Technical Note: Inhibition of Stress Corrosion in Type 304 Stainless Steel by Lithium Silicate
M. L. Holzworth and A. E. Symonds 287

Stress Corrosion via Localized Anodic Dissolution in Cu-Au Alloys
H. W. Pickering 289

The Initial Stages of Oxide Film Formation on Copper and Some Copper Alloys
M. D. Sanderson and J. C. Scully 291

The Variable Corrosion Resistance of 18Cr-8Ni Stainless Steels: Behavior of Commercial Alloys
B. E. Wilde and N. D. Greene, Jr. 300

Corrosion of Cobalt and Cobalt Alloys
F. R. Morral 307

August

Stress Corrosion Cracking and Corrosion Behavior of Titanium in Methanol Solutions: Effect of Metal Ions in Solution
A. J. Sedriks and J. A. S. Green 324

Anodic Polarization Characteristics of Phosphated Steels
R. L. Chance and W. D. France, Jr. 329

Hot Salt Stress Corrosion of a Titanium Alloy: Generation of Hydrogen and Its Embrittling Effect
H. R. Gray 337

Environmental Effects of Sulfur and Sulfur Compounds on the Resistance to Stress Corrosion Cracking of AISI 4340 Steel in Aqueous Chloride Solutions
A. Tirman, E. G. Haney, and Paul Fugassi 342

The Separation of Corrosion and Stress Effects in Stress Corrosion: The Critical Role of Surface Preparation
F. H. Cocks, J. F. Russo, and S. B. Brummer 345

Technical Note: Effect of Applied Current on Stress Corrosion of Beryllium
T. T. King and J. R. Myers . . 349

September

Hydrogen Permeability and Delayed Failure of Polarized Martensitic Steels
C. F. Barth, E. A. Steigerwald, and A. R. Troiano 353

Technique for Studying the Kinetics of Intergranular Crack Nucleation on AISI Type 304 Stainless Steel in Oxygenated Water at 289 C
B. E. Wilde 359

Technical Note: Grain Boundary Grooving Measurement of the Effective Solubility of Stainless Steel in Sodium
J. Hopenfeld and W. M. Robertson 365

Electrochemical Detection of Localized Corrosion
D. A. Jones and N. D. Greene . 367

Corrosion of Type 304 Stainless Steel in Mixed Anhydrous Nitric and Sulfuric Acids
J. M. Viebrock 371

Comments on Anodic Tafel Slopes of Iron
Francis M. Donahue 379

A Method for Improving Hydrogen Sulfide Accelerated Cracking Resistance of Low Alloy Steels
E. Snape, F. W. Schaller, and R. M. Forbes Jones . . . 380

Corrosion Behavior of Types 304 and 316 Stainless Steel in Hot 85% Phosphoric Acid
E. A. Lizlovs 389

Research in Progress: Intergranular Attack of Sensitized Austenitic Stainless Steel by Water Containing Fluoride Ions
D. T. Ward, D. L. Mathis, and R. W. Staehle 394

Revised 1967

Fourth Edition

Corrosion Data Survey

205 new corrosive compounds

10,000 revised or new data postings

This latest revision, which contains over 120 pages in a 9 x 11½ inches book, cloth bound, sewed, is now available.

$60

per copy postpaid. Add book post registry, 3% tax in Texas

Write now for your copy: NACE, 2400 West Loop South, Houston, Texas 77027

October

Rates of Reaction of Dissolved Oxygen with Scavengers in Sweet and Sour Brines
E. S. Snavely and F. E. Blount . 397

The Mechanism of Stress Corrosion Fracture of a Copper Beryllium Alloy
W. D. Sylwestrowicz 405

The Effect of Oxygen on the Compatibility of Niobium with Potassium
R. L. Klueh 416

The Effect of Silicon on the Stress Corrosion Resistance of Low Alloy High Strength Steels
C. S. Carter 423

Correction and Comment on Apparatus for Stress Corrosion Tests in Boiling Magnesium Chloride Solutions
M. A. Streicher and
A. J. Sweet 432

Environmental Effects of Anthraquinone Derivatives on the Resistance to SCC of AISI 4340 Steel in Aqueous Chloride Solutions
A. Tirman, Paul Fugassi,
and E. G. Haney 434

The Relationship of Heat Treatment to the Corrosion Resistance of Stainless Alloys
M. H. Brown 438

November

Protective Films and Structure Dependent Corrosion in Aluminum
O. P. Arora, J. A. Isasi,
and M. Metzger 445

Some Limitations of the Linear Polarization Technique in Evaluating Corrosion Behavior
M. E. Indig and C. Groot . . . 455

Mechanism of Chloride Stress Corrosion Cracking of Austenitic Stainless Steels
P. R. Rhodes 462

Theoretical Considerations in the Measurements of Polarization and Corrosion Potential Curves
W. A. Mueller 473

December

Fractographic Observations of the Stress Corrosion Cracking of Titanium Alloys in Methanolic Environments
C. T. Powell and J. C. Scully . . 483

Stress Corrosion of Type 304 Steel in H_2SO_4/NaCl Environments at Room Temperature
J. D. Harston and J. C. Scully . . 493

Kinetics of the Nickel-Chlorine Reaction at Temperatures Between 350 and 600 C
Bernard J. Downey, John C. Bermel,
and Paul J. Zimmer 502

The Role of the Strain Hardening Exponent in Stress Corrosion Cracking of a High Strength Steel
V. J. Colangelo and
M. S. Ferguson 509

An Automatic Polarization Apparatus for Electrochemical Corrosion Studies
W. D. Henry and B. E. Wilde . . 515

Report: Clarification of the Mechanism of the De-Alloying Phenomena . 519

Errata

"Apparatus for Stress Corrosion Tests in Boiling Magnesium Chloride Solutions" by M. A. Streicher and A. J. Sweet, *Corrosion*, **25**, 1-6 (1969) January. Correction and comment on the paper appears in *Corrosion*, **25**, 432-433 (1969) October.

"Thermal Stability of Hastelloy Alloy C-276" By R. B. Leonard, *Corrosion*, **25**, 222 (1969) May. Correction in the paper appears in *Corrosion*, **25**, 514 (1969) December.

Control of Pipeline Corrosion

Alphabetical Subject Index

CORROSION, Vol. 25, 1969

A

ACID
- Ammonium sulfate, effect on corrosion of metals, 180
- Boric, effect on Alloy 600 in water reactor environments, 194
- Effects on cobalt, 307
- Ferric sulfuric, effect on explosion bonded clad stainless steel, 23
- H_2SO_4/NaCl effects on stainless steel, 493
- Hydrochloric, corrosion resistance of Hastelloy Alloy C-276 in, 222
- Hydrochloric, double layer capacitance measurements of phosphoroorganic compounds in, 69
- Hydrochloric, effect on corrosion of aluminums, 445
- Hydrochloric, effect on glass fiber reinforced plastic, 157
- Hydrochloric, effect on maraging steel, 173
- Hydrochloric, effect on passive layer formation, 130
- Hydrochloric, effect on titanium, 87
- Hydrochloric-methanol, effect on stress corrosion of titanium, 324
- Hydrochloric, tests in to clarify the de-alloying phenomena, 285
- Inhibitive properties of phosphoroorganic compounds in HCl, 69
- Methanol-acid mixture effect on Ti-6Al-4V, 215
- Nitric, effect on Type 304 stainless steel, 371
- Phosphoric, effect on Types 304 and 316 stainless steel, 389
- Sodium hydroxide, behavior of niobium in, 67
- Sulfate-sulfuric, thermal stability of Hastelloy Alloy C-276 in, 222
- Sulfuric, effect on automotive trim materials, 47
- Sulfuric, effect on glass fiber reinforced plastic, 157
- Sulfuric, effect on hydrogen embrittlement of stainless steel, 107
- Sulfuric, effect on maraging steel, 173
- Sulfuric, effect on nickel and Inconel, 151
- Sulfuric, effect on passive layer formation, 130
- Sulfuric, effect on Type 304 stainless steel, 371
- Sulfuric, effect on Types 383, 304, and 316, 300
- Sulfuric, electrochemical and corrosion behavior of Fe-Ni in, 260
- Sulfuric, potentiostatic microscopic study of iron passivation in, 209
- Sulfurous, effect on zinc, 74
- Testing stress corrosion cracking of titanium in acid solutions, 207

Admiralty brass, corrosion behavior in feedwater heaters, 99

Alcohol-iodine, solution used to test stress corrosion cracking of titanium, 207

Alkali metals containing oxygen, effect on refractory metals, 416

Alkaline solutions, effect on stress corrosion cracking, 434

Allihn condenser, its use in stress corrosion tests, 1

ALUMINUM
- Anodic polarization of, 187
- Brass-aluminum condenser tube material, corrosion of, 92
- Coating tests, 187
- Directional effects in stress corrosion cracking, 77
- Effect of electropolishing on corrosion of aluminum specimens, 445
- Effect on stress corrosion of stainless steel, 15
- Environmental cracking of, 243
- Grain morphology studies, 77
- High strength, role of surface preparation in stress corrosion, 345
- Hydrogen sulfide attack of, 119
- Ingergranular stress corrosion of, 77
- Oxidation of aluminum-cobalt, 307
- Predicting stress corrosion performance of Alloy 2219 with solution potential measurements, 199
- Protective films, 445
- Structure dependent corrosion, 445
- Study on stress corrosion cracking of, 77

Aluminized steel, resistance to hydrogen sulfide attack, 119

Ammonia, stress corrosion fracture of copper-beryllium in, 405

Ammonium acetate, effect on corrosion of metals, 180

Ammonium nitrate, effect on corrosion of metals, 180

Anion, its role in passive layer formation, 130

Anodic current effects on beryllium, 349

Anodic dissolution in Cu-Au alloys, 289

Anodic dissolution parameters of Type 316 stainless, 300

ANODIC POLARIZATION
- Anodized aluminum, 187
- Brasses, tests on the dezincification mechanism, 59
- Characteristics regarding phosphated steel, 329
- Effect on chloride stress corrosion cracking, 462
- Effect on hydrogen permeability of high strength steel, 353
- Maraging steel, behavior in acidic solutions, 173
- Metals in fused salt media, 180
- Nickel and Inconel, behavior in acidic chloride solutions, 151
- Niobium, behavior tests in NaOH, 67
- Studies of iron and nickel in sulfuric acid, 260
- Tests on nickel and Inconel in sulfuric acid, 151
- Tests with arsenic as an additive to prevent dezincification of α-brass, 137

Anodic protection in chloride solutions, 267

Anodic protection of metals, 233

Anodic tafel slopes, discussion of, 379

Anodized coatings on aluminum, 187

Aqueous chloride solutions, sulfur effects on AISI steel exposed in, 342

Arrhenius plot of parabolic rate constant of cobalt, 307

Arsenic, an additive to prevent dezincification of α-brass, 137

Anthraquinone derivatives, effect on stress corrosion cracking resistance of AISI 4340 steel in chloride solutions, 434

Automotive trim, corrosion of, 47

B

Beryllium-copper, mechanism of stress corrosion fracture, 405

Beryllium-copper, mode of stress corrosion fracture, 168

Beryllium, effect of applied current on stress corrosion, 349

Boric acid, effect of Alloy 600 in water reactor environments, 194

Brass-aluminum condenser tube material, corrosion of, 92

Brass, dezincification of, 59

Brass, dezincification of, 137

Brittle delayed failure of high strength steel, 353

C

Capacitance measurements, double layer, of phosphoroorganic compounds in hydrochloric acid, 69

Carbide precipitation in stainless steel cladding, 23

Carbon, effect on stress corrosion of stainless steel, 15

Carbon tetrachloride, testing stress corrosion performance of aluminum in, 199
Carpenter 20 Cb-3, effect of heat treatment on corrosion resistance, 438
Cathodic current effects on beryllium, 349

CATHODIC POLARIZATION
Brasses, tests on the dezincification mechanism, 59
Effect on hydrogen permeability of high strength steel, 353
Maraging steel, behavior in acidic solutions, 173
Nickel and Inconel, behavior in acidic chloride solutions, 151
Niobium, behavior tests in NaOH, 67
Studies of iron and steel in sulfuric acid, 260
Tests with arsenic as an additive to prevent dezincification of α-brass, 137
Cathodic protection in chloride solutions, 267
Cathodic protection of 304 stainless steel in oxygenated water, 359
Chloride, effect on anodic and cathodic polarization of maraging steel, 173
Chloride, effect on chromium plated stainless steel, 47
Chloride, effect on nickel and Inconel, 151
Chloride, ferric, effect on corrosion tunnelling of gold-copper alloys, 147
Chloride, magnesium, stress corrosion tests in, 1
Chloride-methanol-water, effect on titanium, 87
Chloride solutions, effect on austenitic stainless steel, 15

CHROMIUM
Chemical passivity of, 233
Cobalt-chromium, oxidation of, 307
Effect on stress corrosion resistance of stainless steel, 15
Effect on sulfidation resistance of Inconel 713C, 126
Hydrogen sulfide attack of, 119
Nickel-chromium-iron, corrosion behavior in borated water, 194
Plated stainless steel, corrosion of, 47
Cladding, resistance to intergranular corrosion (stainless steel), 23
Clarification of the de-alloying phenomena, 285
Clarification of the de-alloying phenomena, 519
Coatings, anodized on aluminum, 187
Coatings loaded with zinc, tests in sulfurous acid, 74
Coatings, phosphate, the chemistry of, 329
Cobalt, chemical passivity of, 233
Cobalt, corrosion studies of, 307

COPPER
Alloys, corrosion behavior in steam generation feedwater heaters, 99
Beryllium-copper, mechanism of stress corrosion fracture, 405
Beryllium-copper, mode of stress corrosion fracture, 168
Effect on stress corrosion of stainless steel, 15
Gold-copper, mechanism of corrosion tunnelling, 147
Internal damping of, 243
Liquidus curves and corrosion in liquid Bi-Pb alloys, 131
Oxide film formation, 291
Pitting in cold water, electrode potential measurements of, 267
Plating, effect on hydrogen absorption of 4340 steel, 116
Role of anodic dissolution in stress corrosion of Cu-Au alloys, 289
Zinc-copper alloys, dezincification of, 59
Corrosion potential curves, measurement of, 473
Cracking, environmental, use of internal damping measurements in the study of, 243
Crevice corrosion, electrochemical detection of, 367
Crevice formation in a copper-beryllium alloy, 405
Current density, critical, used to test corrosion resistance of stainless steel, 47

D
Damping measurements, study of environmental cracking, 243
De-alloying, clarification of the mechanism, 285
De-alloying, clarification of the mechanism, 519
De-icing salt effects on automotive trim, 47
Dezincification, mechanism of de-alloying, 285
Dezincification of α-brass, 137
Dezincification of brasses, mechanism, 59

E
Electrochemical behavior of Fe-Ni alloys in sulfuric acid, 260
Electrochemical detection of localized corrosion, 367
Electrochemical equilibria, electrode potential-temperature diagrams, 267
Electrochemical reactions, measurement of using polarization curves, 473
Electrochemical studies of stress corrosion of titanium, 324
Electrochemical studies with automatic polarization apparatus, 515
Electrochemical study of chloride stress corrosion cracking, 462
Electrochemical techniques used to study corrosion of automotive trim materials, 47
Electrode potential measurements in the thermodynamics and kinetics of metal corrosion, 267
Electrode potential measurements on titanium in methanol solutions, 87
Electrodissolution of nickel, 151
Electron diffraction examination of Ti-6Al-4V in methanol-acid, 215
Electron diffraction studies of oxide film formation on copper, 291
Electron micrographs of Hastelloy Alloy C-276 exposed to ferric sulfate-sulfuric acid, 222
Electron micrograph of zinc phosphated steel, 329
Electron microscopy studies of oxide film formation on copper, 291
Environmental cracking, use of internal damping measurements in the study of, 243
Environmental effects of sulfur on stress corrosion resistance of AISI steel in chloride solutions, 342
Explosion bond stainless steel clads, resistance to intergranular corrosion, 23

F
Fatigue tests with low alloy high strength steel, 423
Feedwater heaters constructed of copper bearing alloys, corrosion behavior of, 99
Ferric chloride, effect on tunnelling of gold-copper alloys, 147
Flaw growth in Ti-6Al-4V in freon environments, 251
Fluoride ions, effect on sensitized austenitic stainless steel, 394
Fractographic observations of stress corrosion cracking of titanium, 483
Fractographs of Ti-6Al-4V exposed in methanol-acid, methanol, and air environments, 215
Fracture behavior of high strength steel, effect of hydrogen permeability, 353
Fracture mechanics, understanding stress corrosion cracking, 193
Fracture toughness tests on low alloy high strength steel, 423
Freon, flaw growth in Ti-6Al-4V exposed to, 251

G
Galvanostatic anodic and cathodic current effects on stress corrosion current effects on stress corrosion of beryllium, 349
Gaseous oxidation of metal, 502
Glass reinforced plastic, degradation in chemical service, 157
Gold-copper alloy, mechanism of corrosion tunnelling, 147
Gravimetric analysis of Type 304 in anhydrous-sulfuric acid mixtures, 371

H
Hastelloy Alloy C-276, time-temperature-transformation, 222
Hastelloy G, effect of heat treatment on corrosion resistance, 438
Heat treatment effects on corrosion resistance of stainless alloys, 438
High purity water effects on Type 304 inhibition by lithium silicate, 287

High strength steel, effect of strain hardening, 509
Honeycomb corrosion in aluminum, 445
Hot corrosion of cobalt alloys, 307
Hot salt stress corrosion of titanium, embrittling effect of hydrogen, 337
Hydride distribution in Alpha annealed Zircaloy plate, photomicrographs, 30
Hydride distribution in Beta quenched Zircaloy, 30

HYDROGEN
Absorption by 4340 steel, effect of surface stress, 116
Diffusion into plastic materials, 157
Effect on chloride stress corrosion cracking of austenitic stainless steel, 462
Effect on stress corrosion of titanium in methanol solutions, 324
Embrittlement of AISI steel in sodium chloride solutions, 342
Embrittlement of high strength steel, 353
Embrittlement of Ti-6Al-4V in methanol-acid mixtures, 215
Embrittlement of 304L stainless steel, 107
Embrittlement resistance of AISI 4340 steel inhibited with anthraquinone derivatives, 434
Embrittling effect on hot salt stress corrosion of titanium, 337
Evolution during anodic and cathodic polarization of Fe-Ni in sulfuric acid, 260
Permeability and delayed failure of polarized martensitic steels, 353
Pickup of Zircaloy, 30
Sulfide attack of Ni-Cr-Al-Fe alloys at high temperature, 119
Sulfide cracking resistance of low alloy steels, 380
Sulfide, effect on Inconel 713C, 126
Sulfide effects on stress corrosion, 342
Sulfide, reaction with dissolved oxygen in sweet and sour brines, 397
Hydroxide, lithium, tests with Zircaloy, 30

I

Immersion tests with stainless steel in hot phosphoric acid, 389
Incoloy, effect of heat treatment on corrosion resistance, 438
Inconel, effect of acidic chloride solutions, 151
Inconel, effect of heat treatment on corrosion resistance, 438
Inconel, sulfidation of, 126

INHIBITORS
Ammonium thiocyanate, effect on polarization of steel, 170
Anthraquinone derivatives on AISI 4340 steel in chloride solutions, 434
Effect on fluoride ion attack of stainless steel, 394
Phosphoroorganic compounds, inhibitive properties of, 69
Lithium silicate, inhibition of stress corrosion cracking of stainless steel, 287
Testing with ammoniated solutions, 170
Intergranular attack of sensitized austenitic stainless steel by water containing fluoride ions, 394
Intergranular cracking of Type 304 stainless, 287
Intergranular corrosion of explosion bonded stainless steel clads, 23
Intergranular corrosion of stainless alloys, effect of heat treatment on, 438
Intergranular crack nucleation on AISI 304 stainless steel in oxygenated water, 359
Intergranular failures of titanium in alcohol-iodine solutions, 207
Intergranular stress corrosion cracking of titanium in methanol, 324
Internal friction, definition, 243
Inverse intergranular corrosion in aluminum, 445
Iron, passivation, potentiostatic microscopic study in sulfuric acid, 209
Isothermal studies of metal-steam reactions, 7

K

Kinetics of intergranular crack nucleation on AISI 304 stainless steel in oxygenated water, 359
Kinetics of metal corrosion, 267
Kinetics of nickel-chlorine reaction at 350-600 C, 502
Kinetics of stainless steel oxidation in steam and air, 7

L

Lead, chemical passivity of, 233
Linear polarization, its limitations in evaluating corrosion behavior, 455
Lithium hydroxide, tests with Zircaloy in, 30
Lithium silicate, inhibitor for Type 304 stainless, 287
Liquidus curves and corrosion of Fe, Ti, Zr, and Cu in liquid Bi-Pb alloys, 131
Low alloy high strength steel, effect of silicon on its resistance to stress corrosion, 423
Low alloy steel, method to improve hydrogen sulfide cracking resistance of, 380

M

Magnesium chloride, effect of carbon and nickel in stainless steel tested in, 15
Magnesium chloride, effect on explosion bonded stainless steel, 23
Magnesium chloride, effects on stress corrosion cracking of austenitic stainless steel, 462
Magnesium chloride, stress corrosion tests in, 1
Manganese, chemical passivity of, 233
Maraging alloys, anodic and cathodic behavior in acidic solutions, 173
Martensite, effect on hydrogen sulfide cracking resistance of low alloy steel, 380
Martensitic steel, hydrogen permeability of, 353

MECHANISM
Anodic dissolution, role in stress corrosion cracking, 289
Anodic protection and passivity of metals, 233
Chloride stress corrosion cracking of austenitic stainless steel, 462
Corrosion of cobalt, 307
Corrosion of Hastelloy Alloy C-276 in ferric sulfate-sulfuric acid, 222
Corrosion vs stress effects in the mechanism of stress corrosion, 345
De-alloying phenomena, 285
Delayed failure and hydrogen permeability of high strength steel, 353
Electrode potential measurements for the study of corrosion, 267
Environmental cracking of metals, 243
Internal damping of metals, 243
Kinetics of intergranular crack nucleation on AISI 304 stainless steel in oxygenated water, 359
Linear polarization technique in evaluating corrosion behavior, 455
Localized corrosion, electrochemical detection of, 367
Notch plasticity, effect on stress corrosion cracking, 193
Oxide film formation on copper alloys, 291
Polarization curve, definition, 473
Stress corrosion fracture, definition, 405

METALS, EXCEPTIONAL
Beryllium-copper, mode of stress corrosion fracture, 168
Electron diffraction examination of Ti-6Al-4V in methanol-acid solution, 215
Flaw growth of titanium in freon environments, 251
Fractographs of Ti-6Al-4V exposed in methanol-acid, methanol, and air environments, 215
Gold, corrosion tunnelling of, 147
Hot salt stress corrosion of titanium, embrittling effect of hydrogen, 337
Internal damping of titanium, 243
Liquidus curves and corrosion of titanium in liquid Bi-Pb alloys, 131
Mercury, double layer capacitance measurements of phosphoroorganic compounds in HCl, 69
Molybdenum depletion in Hastelloy Alloy C-276 in ferric sulfate-sulfuric acid, 222
Molybdenum, effect on stress corrosion of stainless steel, 15
Niobium, behavior tests in NaOH, 67

Stress corrosion cracking of titanium in alcohol-iodine solutions, 207
Stress corrosion cracking of titanium in methanol solutions, 324
Stress corrosion cracking of titanium in methanolic environments, 483
Tantalum-cobalt, oxidation of, 307
Titanium, effect of pure methanol on cracking of, 87
Titanium-electrode potential measurements in the study of corrosion, 267
Titanium, passivation in fused salt electrolytes, 180
Zirconium-cobalt, oxidation of, 307
Zirconium, corrosion and hydrogen pickup of, 30
Zirconium, liquidus curves and corrosion in liquid Bi-Pb alloys, 131
Methanol, effect on cracking of titanium, 87
Methanol, effect on mechanical behavior of Ti-6Al-4V (fractographs), 215
Methanol, effect on stress corrosion cracking of titanium, 324
Methanolic environments, effect on titanium, 483
Methyl alcohol, testing stress corrosion performance of aluminum in, 199
Micrographs of oxide growth on copper, 291
Microscopic study of iron passivation in sulfuric acid, 209
Monel, corrosion behavior in feedwater heaters, 99

N

NICKEL
Alloy 600, corrosion behavior in borated pressurized water reactor environments, 194
Chemical passivity of, 233
Chlorine-nickel reaction at 350-600 C, 502
Chromium-iron-nickel, corrosion behavior in borated water, 194
Effect of acidic chloride solutions, 151
Effect on stress corrosion resistance of stainless steel, 15
Electrochemical and corrosion behavior of Fe-Ni in sulfuric acid, 260
Hydrogen sulfide attack of, 119
Oxidation of cobalt-nickel, 307
Passivation in fused salt electrolytes, 180
Sulfidation of Inconel 713C, 126
Niobium, behavior tests in NaOH, 67
Niobium, compatibility with niobium, 416
Nitrogen, effect on stress corrosion of stainless steel, 15
Nonferrous materials in neutral water contain low oxygen content, 99
Notch plasticity, contribution to stress corrosion cracking, 193

O

Organic dyestuffs, effect on stress corrosion cracking, 434
Oxalic acid testing of explosion bonded stainless steel clad, 23
Oxidation of cobalt, 307
Oxidation of niobium, 67
Oxidation of stainless steel by steam and by air, 7
Oxide film formation during passivation, 233
Oxide film formation on copper alloys, 291
Oxidization of metals in fused salt electrolytes, 180

OXYGEN
Effect on cobalt, 307
Effect on compatibility of niobium with potassium, 416
Effect on hot salt stress corrosion of titanium, 337
Effects on intergranular crack nucleation on AISI 304 stainless steel in oxygenated water, 359
Effects on hydriding of Zircaloy, 30
Effect on stress corrosion of titanium in methanol solutions, 324
Oxide film formation on copper in, 291
Rates of reaction of dissolved oxygen with scavengers in sweet and sour brines, 397

P

Passivation diagrams, 233
Passivation in fused salt electrolytes, 180
Passivation of iron in sulfuric acid, 209
Passivation of metals in fused salt electrolytes, 180
Passive layer formation, role of the anion, 130
Passivity index for metals, 233
Passivity of metals, 233
Passivating tendencies of stainless steel, 300
Peroxide solutions, effect on stress corrosion cracking, 434
Phosphated steel, anodic polarization characteristics, 329
Phosphoric acid effects on Types 304 and 316 stainless steel, 389
Phosphoroorganic compounds, double layer capacitance measurements in, 69
Phosphorus, effect on stress corrosion resistance of stainless steel, 15
Plastic deformation of AISI 304 stainless steel in oxygenated water, 359
Plastics, reinforced, behavior in chemical service, 157
Polarization apparatus (automatic) for electrochemical studies, 515
Polarization behavior in metals, 233
Polarization experiments with stainless steel in hot phosphoric acid, 389
Polarization, measurements of, 473
Polarization studies of aluminum-brass corrosion, 92
Polarization studies of stainless steel, 300
Polarization testing of chromium plated stainless steel, 47
Potassium bisulfate, effect on corrosion of metals, 180
Potassium, compatibility with niobium, 416
Potassium dichromate, effect on corrosion of metals, 180
Potentiodynamic anodic polarization curves of phosphated steel, 329
Potentiodynamic anodic polarization, method used to study corrosion of automotive trim, 47
Potentiodynamic polarization curves of stainless steel in hot phosphoric acid, 389
Potentiostatic measurements of corroding aluminum-brass, 92
Potentiostatic microscopic study of iron passivation in sulfuric acid, 209
Potentiostatic polarization of anodized aluminum coatings, 187
Potentiostatic polarization tests on maraging steel in acidic solutions, 173
Potentiostatically controlled testing of dezincification of brasses, 59
Precorrosion, definition, 345
Protective films and structure dependent corrosion in aluminum, 445

R

Reactor environments, corrosion behavior of Alloy 600 in, 194
Reactor materials, hydrogen sulfide attack of, 119
Reactor vessels, use of stainless steel clad on carbon steel, 23
Refractory metals, resistant to alkali metals containing oxygen, 416
Reinforced plastic material, effects in chemical service, 157

S

Salt effect on stress corrosion of titanium at high temperature, 337
Salt, passivation of metals in solutions of, 180
Salt spray, technique used to study corrosion of automotive trim, 47
Scavengers for brines, 397
Sea water, synthetic, medium used to test stress corrosion effects of beryllium under applied current, 349
Silicon, effect on stress corrosion in stainless steel, 15
Silicon, effect on stress corrosion resistance of low alloy high strength steel, 423
Silver, passivation, corrosion, immunity diagrams, 267
Single crystal growth to study the de-alloying mechanism, 285

SODIUM CHLORIDE
Effect of applied current on stress corrosion of beryllium under applied current, 349
Effect on stress corrosion of AISI steel, 342
Solution used to determine silicon effect on stress corrosion resistance of low alloy high strength steel, 423
Test in to clarify the de-alloying phenomena, 285

Testing stress corrosion of aluminum in, 199
Sodium, grain boundary grooving measurement of solubility of stainless steel in, 365
Sodium hydroxide, behavior of niobium in, 67
Sodium hydroxide, effect on corrosion of metals, 180
Sodium hydroxide, effect on hydrogen embrittlement of stainless steel, 107
Sodium nitrate, effect on corrosion of metals, 180
Sodium sulfite, on oxygen scavenging chemical for brines, 397
Solution potential measurement, testing stress corrosion performance of aluminum, 199
Steam, effects on oxidation of stainless steel, 7

STAINLESS STEEL
Austenitic, influence of alloying elements on stress corrosion, 15
Automotive trim, corrosion of, 47
Cathodic charging, effect on hydrogen embrittlement of, 107
Chloride stress corrosion cracking, 462
Chromium plated, corrosion of, 47
Cladding on carbon steel, photomicrographic study of tests on intergranular corrosion, 23
Clad on carbon steel, resistance to intergranular corrosion, 23
Corrosion of Type 304 in mixed anhydrous nitric and sulfuric acids, 371
Corrosion potential-time studies, 300
Corrosion resistance of 18Cr-8Ni, 300
Effects of H_2SO_4/NaCl on Type 304, 493
Electrochemical and corrosion behavior of Types 383, 304, and 316 in sulfuric acid, 300
Electrochemical detection of localized corrosion in Type 304, 367
Explosion bonded clads, resistance to intergranular corrosion, 23
Grain boundary grooving measurement of solubility of stainless steel in sodium, 365
Heat treatment effects on corrosion resistance of, 438
Hydrogen embrittlement of Type 304L, 107
Intergranular attack of sensitized austenitic stainless steel by water containing fluoride ions, 394
Intergranular crack nucleation on AISI Type 304 in oxygenated water, 359
Linear polarization technique in evaluating corrosion behavior, 455
Oxidation by steam and by air, 7
Phosphoric acid, effects on Types 304 and 316, 389
Photomicrographs of intergranular cracking of Type 304 in oxygenated water, 359
Stress corrosion tests in magnesium chloride solutions, 1
Steam, effect on aluminum-brass condenser tube material, 92
Strain amplitude effect on damping measurement, 243
Strain hardening effect on stress corrosion cracking of high strength steels, 509
Strain, plastic, effect on stress corrosion cracking, 193

STRESS CORROSION CRACKING
Alloy elements' influence on corrosion behavior, 15
Aluminum, intergranular corrosion, directional effects of, 77
Beryllium-copper, mode of fracture, 168
Chloride stress corrosion cracking of austenitic stainless steel, 462
Copper-beryllium, mode of fracture, 168
Effect of applied current on beryllium, 349
Electrode potential measurements in the study of corrosion, 267
Flaw growth in Ti-6Al-4V in freon environments, 251
H_2SO_4/NaCl effects on Type 304 stainless steel, 493
Hot salt stress corrosion of titanium, embrittling effect of hydrogen, 337
Hydrogen induced, 353
Inhibition of Type 304 stainless by lithium silicate, 287
Inhibitive effects of anthraquinone derivatives on AISI 4340 steel in chloride solutions, 434
Intergranular, aluminum, 77
Intergranular, failure of titanium in alcohol-iodine solutions, 207
Mechanism of fracture in a copper-beryllium alloy, 405
Notch plasticity, research report, 193
Plastic zone behavior, 193
Predicting stress corrosion performance of 2219 aluminum with solution potential measurements, 199
Role of anodic dissolution in cracking of Cu-Au alloys, 289
Separation of corrosion and stress effects in stress corrosion: Role of surface preparation, 345
Silicon effect on stress corrosion resistance of low alloy high strength steel, 423
Strain hardening effects, 509
Sulfur effects on stress corrosion cracking of AISI 4340 steel in chloride solutions, 342
Tests in boiling magnesium chloride solutions, 1
Tests in magnesium chloride solutions, 1
Titanium cracking in methanolic environments, 483
Titanium exposed to methanol solutions, 324
Titanium, testing in alcohol-iodine solutions, 207
Stress effects on explosion bonded stainless steel clads, 23
Stress effects on Ti-6Al-4V in freon environments, 251
Stress effects on titanium exposed in methanol, 87
Stress effects vs corrosion in the mechanism of stress corrosion, 345
Stresses, role in stress corrosion of stainless steel, 15
Structure dependent corrosion in aluminum, 445
Sulfidation of cobalt, 307
Sulfidation of Inconel 713C, 126
Sulfide attack of Ni-Cr-Al-Fe alloys at high temperature, 119
Sulfide cracking resistance of low alloy steels, 380
Sulfur dioxide, on oxygen scavenging chemical for brines, 397
Sulfur dioxide, effect on zinc, 74
Sulfur dioxide, oxide film formation on copper in atmosphere of, 291
Sulfur effects on stress corrosion cracking of AISI 4340 steel in chloride solutions, 342
Sulfur, effect on stress corrosion of stainless steel, 15
Surface preparation, its role in stress corrosion, 345
Surface stress, effect on hydrogen absorption of 4340 steel, 116
Sustained load tests with low alloy high strength steel, 423

T
Tafel slopes, discussion of, 379
Tantalum-cobalt, oxidation of, 307

TEMPERATURE, HIGH
Effect of oxygen on compatibility of niobium with potassium, 416
Effects on Zircaloy in concentrated lithium hydroxide, 30
Hot salt stress corrosion of titanium, 337
Hydrogen sulfide attack of Ni-Cr-Al-Fe alloys at 1000-1800 F, 119
Kinetics of nickel-chlorine reaction at 350-600 C, 502
Linear polarization technique in evaluating corrosion behavior, 455
Oxidation studies on stainless steel, 7
Plastic materials, effect on, 157
Stress corrosion tests in boiling magnesium chloride solutions, 1
Sulfidation of Inconel 713C, 126
Thermal stability of Hastelloy Alloy C-267 in chemical environments, 222
Thermal stability of Hastelloy Alloy C-267, 222
Thermodynamic examination of passivation, 233
Thermodynamics of metal corrosion, 267

Thermographic testing, method used to study corrosion of chromium plated stainless steel, 47
Thermogravimetric technique of measuring oxidation, 7
Thiosulfate ions, effect on chromium plated stainless steel, 47

TITANIUM
Electrode potential measurements in the study of corrosion, 267
Electron diffraction examination of Ti-6Al-4V in methanol-acid, 215
Flaw growth in Freon environments, 251
Fractographs of Ti-6Al-4V exposed in methanol-acid, methanol, and air environments, 215
Hot salt stress corrosion of, embrittling effect of hydrogen, 337
Internal damping of, 243
Liquidus curves and corrosion in liquid Bi-Pb alloys, 131
Passivation in fused salt electrolytes, 180
Stress corrosion cracking in alcohol-iodine solutions, 207
Stress corrosion cracking in methanol solutions, 324
Transgranular cracking of Type 304 stainless, 287
Tungsten-cobalt, oxidation of, 307
Tunnelling, corrosion, mechanism of, 147

W

Water, borated, effect on Alloy 600 in reactor environments, 194
Water permeation tests on reinforced plastics, 157

X

X-ray diffraction, studies of stainless steel oxidation, 7
X-ray diffraction, tests on stress corrosion of copper-beryllium alloys, 168
X-ray studies of stress corrosion of titanium in methanol solutions, 324

Z

Zinc-copper, dezincification of, 59
Zinc corrosion in sulfurous acid, 74
Zircaloy, corrosion and hydrogen pickup of, in lithium hydroxide solutions, 30
Zirconium-cobalt, oxidation of, 307
Zirconium, liquidus curves and corrosion in liquid Bi-Pb alloys, 131
Zinc phosphated steel, corrosion resistance of, 329

Alphabetical Author Index

CORROSION, Vol. 25, 1969

A

Annamalai, Pl.
See K. Balakrishnan, 92
Arora, O. P.
Protective Films and Structure Dependent Corrosion in Aluminum, with J. A. Isasi and M. Metzger, 445

B

Balakrishnan, K.
Corrosion Studies of Aluminum–Brass Condenser Tube Material, with Pl. Annamalai, B. Sathianandham, N. Subramanyan, and S. Sampath, 92
Barth, C. F.
Hydrogen Permeability and Delayed Failure of Polarized Martensitic Steels, with E. A. Steigerwald and A. R. Troiano, 353
Bates, J. F.
See A. W. Loginow, 15
Beck, F. H.
See J. E. Reinoehl, 233
Bermel, John C.
See Bernard J. Downey, 502
Berry, W. E.
See D. van Rooyen, 194
Bittel, J. T.
Oxidation of 304L Stainless Steel by Steam and by Air, with L. H. Sjodahl and J. F. White, 7
Blount, F. E.

Send Your Manuscript. . .
. . .for consideration of publication to the Managing Editor, *Corrosion,* 2400 West Loop South, Houston, Texas 77027 or to the Editor, M. G. Fontana, Department of Metallurgical Engineering, Ohio State University, Columbus, Ohio. Only original manuscripts that contribute significantly to the science of corrosion should be submitted for consideration.
